

Christian Muehlendyck

Member of the IHI JU Science and Innovation Panel

Scientific Partnerships Lead Europe, Middle East & Africa (EMEA)

Johnson&Johnson MedTech

Christian Muehlendyck is a Medical Doctor with a Master in Business Administration and a degree in Market Access. He was born and currently resides in Germany.

He holds the position of Strategic Partnerships Lead for Johnson & Johnson MedTech in the Europe, Middle East and Africa (EMEA) region. In this role, he focuses is on the various IHI activities of J&J MedTech. This includes the establishment and industry leadership of [IDERHA](#), one of the first IHI public-private partnerships. Additionally, he assumes the role of Co-Chair of the MedTech Europe Research & Innovation Committee.

He began his career as a physician in Orthopedic and General Surgery and obtained his MD/PhD while co-leading the development of an innovative Medical Device. He subsequently transitioned into the MedTech industry to further pursue his passion for medical innovation.

Within Johnson & Johnson he has held a series of local, regional and global roles of increasing responsibility spanning from Medical Training as well as commercial positions to Health Economics & Market Access across the surgical and orthopedic spectrum. Within those roles he worked closely with physicians, patients & health authorities and acquired a broad expertise in health care innovation and research incl. value-based healthcare and healthcare digitalization such as robotic surgery.
